

LSM4199 HONOURS PROJECT IN LIFE SCIENCES (16 MCs)

Project Mounting & Registration for LSM4199 Cohort AY17/18 S2

Students commencing LSM4199 Honours Project in Life Sciences in Semester 2 of AY2017/2018 will be in the LSM4199 Honours Project Cohort of AY17/18 S2.

For students intending to start LSM4199 in AY2017/2018 Semester 2

1. Please read, understand and adhere strictly to the [LSM4199 Guidelines for Students](#) which include registration instructions for projects for LSM4199.
2. Students should approach eligible main supervisors to seek project opportunities. Visit http://www.lifesciences.nus.edu.sg/modules/lsm4199/LSM4199_List_of_eligible_supervisors.xls for the list of eligible supervisors.
3. Students may also view projects put up by eligible supervisors in the Science Intranet at <https://neon.science.nus.edu.sg/intranet/student/undergraduate/lspa/> during the project mounting period. Projects will be mounted from time to time by supervisors from now till before the start of AY2017/2018 Semester 1. Students looking for projects can check the list regularly.
4. Registration for a project should be completed by start of AY2017/2018 Semester 2, **Mon 15th January 2018**.

For faculty members intending to be LSM4199 Honours Project Main Supervisors

1. Please read, understand and adhere strictly to the [LSM4199 Guidelines for Supervisors](#).
2. If you have been approached and have agreed to offer project and supervision to students from the LSM4199 cohort here-mentioned, or if you would like to offer projects for students to select, please mount the projects and approve the students for the relevant projects. **Please note the project area has to match the student's specialisation in Life Sciences Major.**
3. Projects are mounted in the Science Intranet under the 'Undergraduate' tab at <https://neon.science.nus.edu.sg/intranet/staff/undergraduate/lspa/staff/>.
4. Approving students to projects can then be done at the same portal via the project approving interface. **Kindly note that this is an in-principle approval for the student. The criteria to read LSM4199 would still need to be fulfilled. Failure to meet so before the start of the Semester 2 would automatically make the project approval invalid.**
5. If you encounter problems in registering/approving the student, please forward his/her details (full name, matriculation number and contact number) to Miss Yvonne Fong dbsyfcy@nus.edu.sg.

For enquiries on LSM4199, please contact Miss Yvonne Fong, LSM4199 Overall Administrator, at dbsyfcy@nus.edu.sg.
